MNMI RH Options Papers 13March2017 v3 forWednesdayam.docx

Thanks! Feel like taking a shot at the 2-3 sentence taconite summary? Attached is my pager. The OGC summary from last week is also pretty good.

Louisiana

Background: On July 3, 2012, EPA partially disapproved Louisiana's regional haze plan. In October 2016 EPA proposed approval of the state's revised plan which addressed technology requirements for four non-EGUs. EPA has approved all elements of Louisiana's plan except for specific EGU technology determinations. EPA was sued by Sierra Club for failure to act on the deficiencies left by the partial disapproval without a federal replacement. A consent decree requires EPA to sign a proposed action to address the outstanding requirements in Louisiana by June 29, 2017, (extended 90 days by joint party agreement) and finalize action by December 15, 2017. On February 10, 2017, EPA received Louisiana's final plan submittal to address the outstanding technology requirements for EGUs.

Can you work on the background summary for Louisiana like Mike's for Utah below? I attached the Region's most recent pager on Louisiana.

Subject: Draft write-up

Here's a suggested format. Thoughts?

Utah

Background: On June 1, 2016, EPA disapproved a portion of Utah's regional haze SIP and, instead, adopted a FIP to meet the technology requirement for NOx for two power plants. The state (and the affected power company) filed petitions for review and a motion to stay the FIP, and the power company filed a petition for reconsideration. In December 2016, EPA filed a response motion opposing the stay request. In February 2017, the 10th Circuit Court ordered EPA to file a supplement to its motion indicating whether it continued to oppose a stay. EPA's response is due March 23, 2017.
